

Policy Statements and Procedures

RELATIONSHIP AND HEALTH EDUCATION POLICY

Introduction

This Relationship and Health Education Policy is based on DfE guidance June 2019 'Relationships Education, Relationships and Sex Education (RSE) and Health Education', which is statutory guidance from the Department for Education (DfE) issued under Section 80A of the Education Act 2002.

The Rosedale Hewens Academy Trust is committed to providing an excellent educational experience for all its pupils. Relationship and Health Education is lifelong learning about physical, moral and emotional development.

Principles

The Rosedale Hewens Academy Trust:

- Expects all pupils to develop a healthier, safer lifestyle;
- Expects all pupils to respect and care for their bodies.

Consultation with Parents, Guardians and Carers

A consultation took place between March 23rd and May 22nd 2020. Parents, guardians and carers were informed of the draft policy and given access to a copy, as well as a copy of the DfE guidance, and invited to submit their responses via email. The consultation received six responses from parents, guardians and carers in the primary phase. If you missed this consultation window and would like to ask any questions about this policy, please contact your child's Headteacher.

Relationships Education and Health Education in the Primary Phase

This policy is supported by the following statutory guidance documents or is underpinned by statutory guidance:

- DfE guidance June 2019 'Relationships Education, Relationships and Sex Education (RSE) and Health Education', which is statutory guidance from the Department for Education (DfE) issued under Section 80A of the Education Act 2002.
- The Relationships Education, Relationships and Sex Education, and Health Education (England) Regulations 2019 are made under sections 34 and 35 of the Children and Social Work Act 2017.
- Keeping Children Safe in Education (September 2018)
- Working Together to Safeguard Children (July 2018)
- Children Act 1989 and 2004
- Children and Families Act 2014
- Special Educational Needs and Disability (SEND) Code of Practice (January 2015)
- Safeguarding Vulnerable Adults Groups Act 2006
- Equality Act 2010

Introduction

Secretary of State Foreword

Today's children and young people are growing up in an increasingly complex world and living their lives seamlessly on and offline. This presents many positive and exciting opportunities, but also challenges and risks. In this environment, children and young people need to know how to be safe and healthy, and how to manage their academic, personal and social lives in a positive way.

This is why we have made Relationships Education compulsory in all primary schools in England and Relationships and Sex Education compulsory in all secondary schools, as well as making Health Education compulsory in all state-funded schools. The key decisions on these subjects have been informed by a thorough engagement process, including a public call for evidence that received over 23,000 responses from parents, young people, schools and experts and a public consultation where over 40,000 people contacted the Department for Education.

The depth and breadth of views is clear, and there are understandable and legitimate areas of contention. Our guiding principles have been that all of the compulsory subject content must be age appropriate and developmentally appropriate. It must be taught sensitively and inclusively, with respect to the backgrounds and beliefs of pupils and parents while always with the aim of providing pupils with the knowledge they need of the law.

We are clear that parents and carers are the prime educators for children on many of these matters. Schools complement and reinforce this role and have told us that they see building on what pupils learn at home as an important part of delivering a good education. We agree with this principle and congratulate the many schools delivering outstanding provision to support the personal development and pastoral needs of their pupils. We are determined that the subjects must be deliverable and give schools flexibility to shape their curriculum according to the needs of their pupils and communities.

In primary schools, we want the subjects to put in place the key building blocks of healthy, respectful relationships, focusing on family and friendships, in all contexts, including online. This will sit alongside the essential understanding of how to be healthy. At secondary, teaching will build on the knowledge acquired at primary and develop further pupils' understanding of health, with an increased focus on risk areas such as drugs and alcohol, as well as introducing knowledge about intimate relationships and sex.

Teaching about mental wellbeing is central to these subjects, especially as a priority for parents is their children's happiness. We know that children and young people are increasingly experiencing challenges, and that young people are at particular risk of feeling lonely. The new subject content will give them the knowledge and capability to take care of themselves and receive support if problems arise.

All of this content should support the wider work of schools in helping to foster pupil wellbeing and develop resilience and character that we know are fundamental to pupils being happy, successful and productive members of society. Central to this is pupils' ability to believe that they can achieve goals, both academic and personal; to stick to tasks that will help them achieve those goals, even when the reward may be distant or uncertain; and to recover from knocks and challenging periods in their lives.

This should be complemented by development of personal attributes including kindness, integrity, generosity, and honesty. We have endeavoured to ensure the content is proportionate and deliverable. Whilst we are not mandating content on financial education or careers, we want to support the high quality teaching of these areas in all schools as part of a comprehensive programme, which complements the national curriculum where appropriate and meets the ambitions of the Careers Strategy. We know that many schools will choose to teach the compulsory content within a wider programme of Personal, Social, Health and Economic Education or similar. Schools are encouraged to continue to do so, if this is right for them, and build on established, high quality programmes.

These subjects represent a huge opportunity to help our children and young people develop. The knowledge and attributes gained will support their own, and others', wellbeing and attainment and help young people to become successful and happy adults who make a meaningful contribution to society.

Curriculum content for Relationships Education

A good understanding of pupils' faith backgrounds and positive relationships between the school and local faith communities help to create a constructive context for the teaching of these subjects, and we are always keen to engage with any parents, guardians or carers who have questions or concerns.

In accordance with the DfE statutory guidance, and the national curriculum, the school must provide relationships education and health education. In all schools, teaching should reflect the law, including the

Equality Act 2010, as it applies to relationships, so that young people clearly understand what the law allows and does not allow, and the wider legal implications of decisions they may make.

An understanding for all pupils of healthy relationships, acceptable behaviour and the right of everyone to equal treatment will help ensure that pupils treat each other well and go on to be respectful and kind adults.

The Relationships Education curriculum is designed on the following guidance from the DfE:

- The focus in primary school should be on teaching the fundamental building blocks and characteristics of positive relationships, with particular reference to friendships, family relationships, and relationships with other children and with adults.
- This starts with pupils being taught about what a relationship is, what friendship is, what family means and who the people are who can support them. From the beginning of primary school, building on early education, pupils should be taught how to take turns, how to treat each other with kindness, consideration and respect, the importance of honesty and truthfulness, permission seeking and giving, and the concept of personal privacy. Establishing personal space and boundaries, showing respect and understanding the differences between appropriate and inappropriate or unsafe physical, and other, contact – these are the forerunners of teaching about consent, which takes place at secondary.
- Respect for others should be taught in an age-appropriate way, in terms of understanding one's own and others' boundaries in play, in negotiations about space, toys, books, resources and so on.
- From the beginning, teachers should talk explicitly about the features of healthy friendships, family relationships and other relationships which young children are likely to encounter. Drawing attention to these in a range of contexts should enable pupils to form a strong early understanding of the features of relationships that are likely to lead to happiness and security. This will also help them to recognise any less positive relationships when they encounter them.
- The principles of positive relationships also apply online especially as, by the end of primary school, many children will already be using the internet. When teaching relationships content, teachers should address online safety and appropriate behaviour in a way that is relevant to pupils' lives. Teachers should include content on how information and data is shared and used in all contexts, including online; for example, sharing pictures, understanding that many websites are businesses and how sites may use information provided by users in ways they might not expect.
- Teaching about families requires sensitive and well-judged teaching based on knowledge of pupils and their circumstances. Families of many forms provide a nurturing environment for children. (Families can include for example, single parent families, LGBT parents, families headed by grandparents, adoptive parents, foster parents/carers amongst other structures.) Care needs to be taken to ensure that there is no stigmatisation of children based on their home circumstances and needs, to reflect sensitively that some children may have a different structure of support around them; e.g. looked after children or young carers.
- A growing ability to form strong and positive relationships with others depends on the deliberate cultivation of character traits and positive personal attributes, (sometimes referred to as 'virtues') in the individual. In a school wide context which encourages the development and practice of resilience and other attributes, this includes character traits such as helping pupils to believe they can achieve, persevere with tasks, work towards long-term rewards and continue despite setbacks. Alongside understanding the importance of self-respect and self-worth, pupils should develop personal attributes including honesty, integrity, courage, humility, kindness, generosity, trustworthiness and a sense of justice. This can be achieved in a variety of ways including by providing planned opportunities for young people to undertake social action, active citizenship and voluntary service to others locally or more widely.
- Relationships Education also creates an opportunity to enable pupils to be taught about positive emotional and mental wellbeing, including how friendships can support mental wellbeing.

- Through Relationships Education (and RSE), schools should teach pupils the knowledge they need to recognise and to report abuse, including emotional, physical and sexual abuse. In primary schools, this can be delivered by focusing on boundaries and privacy, ensuring young people understand that they have rights over their own bodies. This should also include understanding boundaries in friendships with peers and also in families and with others, in all contexts, including online. Pupils should know how to report concerns and seek advice when they suspect or know that something is wrong. At all stages it will be important to balance teaching children about making sensible decisions to stay safe (including online) whilst being clear it is never the fault of a child who is abused and why victim blaming is always wrong. These subjects complement Health Education and as part of a comprehensive programme and whole school approach, this knowledge can support safeguarding of children.

By the end of primary school:

Pupils should know

<p>Families and people who care for me</p>	<ul style="list-style-type: none"> • that families are important for children growing up because they can give love, security and stability. • the characteristics of healthy family life, commitment to each other, including in times of difficulty, protection and care for children and other family members, the importance of spending time together and sharing each other's lives. • that others' families, either in school or in the wider world, sometimes look different from their family, but that they should respect those differences and know that other children's families are also characterised by love and care. • that stable, caring relationships, which may be of different types, are at the heart of happy families, and are important for children's security as they grow up. • that marriage represents a formal and legally recognised commitment of two people to each other which is intended to be lifelong. • how to recognise if family relationships are making them feel unhappy or unsafe, and how to seek help or advice from others if needed.
<p>Caring friendships</p>	<ul style="list-style-type: none"> • how important friendships are in making us feel happy and secure, and how people choose and make friends. • the characteristics of friendships, including mutual respect, truthfulness, trustworthiness, loyalty, kindness, generosity, trust, sharing interests and experiences and support with problems and difficulties. • that healthy friendships are positive and welcoming towards others, and do not make others feel lonely or excluded. • that most friendships have ups and downs, and that these can often be worked through so that the friendship is repaired or even strengthened, and that resorting to violence is never right. • how to recognise who to trust and who not to trust, how to judge when a friendship is making them feel unhappy or uncomfortable, managing conflict, how to manage these situations and how to seek help or advice from others, if needed.
<p>Respectful relationships</p>	<ul style="list-style-type: none"> • the importance of respecting others, even when they are very different from them (for example, physically, in character, personality or backgrounds), or make different choices or have different preferences or beliefs. • practical steps they can take in a range of different contexts to improve or support respectful relationships. • the conventions of courtesy and manners. • the importance of self-respect and how this links to their own happiness. • that in school and in wider society they can expect to be treated with respect by others, and that in turn they should show due respect to others, including those in positions of authority.

Online relationships	<p>Pupils should know</p> <ul style="list-style-type: none"> • that people sometimes behave differently online, including by pretending to be someone they are not. • that the same principles apply to online relationships as to face-to-face relationships, including the importance of respect for others online including when we are anonymous. • the rules and principles for keeping safe online, how to recognise risks, harmful content and contact, and how to report them. • how to critically consider their online friendships and sources of information including awareness of the risks associated with people they have never met. • how information and data is shared and used online.
Being safe	<ul style="list-style-type: none"> • what sorts of boundaries are appropriate in friendships with peers and others (including in a digital context). • about the concept of privacy and the implications of it for both children and adults; including that it is not always right to keep secrets if they relate to being safe. • that each person’s body belongs to them, and the differences between appropriate and inappropriate or unsafe physical, and other, contact. • how to respond safely and appropriately to adults they may encounter (in all contexts, including online) whom they do not know. • how to recognise and report feelings of being unsafe or feeling bad about any adult. • how to ask for advice or help for themselves or others, and to keep trying until they are heard. • how to report concerns or abuse, and the vocabulary and confidence needed to do so. • where to get advice e.g. family, school and/or other sources.

Health Education

The aim of teaching pupils about physical health and mental wellbeing is to give them the information that they need to make good decisions about their own health and wellbeing. It should enable them to recognise what is normal and what is an issue in themselves and others and, when issues arise, know how to seek support as early as possible from appropriate sources.

Physical health and mental wellbeing are interlinked, and it is important that pupils understand that good physical health contributes to good mental wellbeing, and vice versa.

It is important for schools to promote pupils’ self-control and ability to self-regulate, and strategies for doing so. This will enable them to become confident in their ability to achieve well and persevere even when they encounter setbacks or when their goals are distant, and to respond calmly and rationally to setbacks and challenges. This integrated, whole-school approach to the teaching and promotion of health and wellbeing has a potential positive impact on behaviour and attainment.

Effective teaching should aim to reduce stigma attached to health issues, in particular those to do with mental wellbeing. Schools should engender an atmosphere that encourages openness. This will mean that pupils feel they can check their understanding and seek any necessary help and advice as they gain knowledge about how to promote good health and wellbeing.

Schools have flexibility to design and plan age-appropriate subject content, but the DfE guidance sets out core areas for health and wellbeing that are appropriate for primary and secondary aged pupils.

Puberty including menstruation should be covered in Health Education and should, as far as possible, be addressed before onset. This should ensure male and female pupils are prepared for changes they and their peers will experience.

Menstruation

The onset of menstruation can be confusing or even alarming for girls if they are not prepared. Pupils should be taught key facts about the menstrual cycle including what is an average period, range of menstrual products and the implications for emotional and physical health. In addition to curriculum content, schools should also make adequate and sensitive arrangements to help girls prepare for and manage menstruation including with requests for menstrual products.

Physical health and mental wellbeing

The focus in primary school should be on teaching the characteristics of good physical health and mental wellbeing. Teachers should be clear that mental wellbeing is a normal part of daily life, in the same way as physical health.

This starts with pupils being taught about the benefits and importance of daily exercise, good nutrition and sufficient sleep, and giving pupils the language and knowledge to understand the normal range of emotions that everyone experiences. This should enable pupils to articulate how they are feeling, develop the language to talk about their bodies, health and emotions and judge whether what they are feeling and how they are behaving is appropriate and proportionate for the situations that they experience.

Teachers should go on to talk about the steps pupils can take to protect and support their own and others' health and wellbeing, including simple self-care techniques, personal hygiene, prevention of health and wellbeing problems and basic first aid.

Emphasis should be given to the positive two-way relationship between good physical health and good mental wellbeing, and the benefits to mental wellbeing of physical exercise and time spent outdoors.

Pupils should also be taught the benefits of hobbies, interests and participation in their own communities. This teaching should make clear that people are social beings and that spending time with others, taking opportunities to consider the needs of others and practising service to others, including in organised and structured activities and groups (for example the scouts or girl guide movements), are beneficial for health and wellbeing.

Pupils should be taught about the benefits of rationing time spent online and the risks of excessive use of electronic devices. In later primary school, pupils should be taught why social media, computer games and online gaming have age restrictions and should be equipped to manage common difficulties encountered online.

A firm foundation in the benefits and characteristics of good health and wellbeing will enable teachers to talk about isolation, loneliness, unhappiness, bullying and the negative impact of poor health and wellbeing.

By the end of primary school, pupils should know:

Mental wellbeing	<ul style="list-style-type: none"> • that mental wellbeing is a normal part of daily life, in the same way as physical health; • that there is a normal range of emotions (e.g. happiness, sadness, anger, fear, surprise, nervousness) and scale of emotions that all humans experience in relation to different experiences and situations; • how to recognise and talk about their emotions, including having a varied vocabulary of words to use when talking about their own and others' feelings; • how to judge whether what they are feeling and how they are behaving is appropriate and proportionate; • the benefits of physical exercise, time outdoors, community participation, voluntary and service-based activity on mental wellbeing and happiness; • simple self-care techniques, including the importance of rest, time spent with friends and family and the benefits of hobbies and interests; • isolation and loneliness can affect children and that it is very important for children to discuss their feelings with an adult and seek support; • that bullying (including cyberbullying) has a negative and often lasting impact on mental wellbeing; • where and how to seek support (including recognising the triggers for seeking support), including whom in school they should speak to if they are worried
-------------------------	--

	<p>about their own or someone else’s mental wellbeing or ability to control their emotions (including issues arising online);</p> <ul style="list-style-type: none"> it is common for people to experience mental ill health. For many people who do, the problems can be resolved if the right support is made available, especially if accessed early enough.
Internet safety and harms	<ul style="list-style-type: none"> that for most people the internet is an integral part of life and has many benefits; about the benefits of rationing time spent online, the risks of excessive time spent on electronic devices and the impact of positive and negative content online on their own and others’ mental and physical wellbeing; how to consider the effect of their online actions on others and know how to recognise and display respectful behaviour online and the importance of keeping personal information private; why social media, some computer games and online gaming, for example, are age restricted; that the internet can also be a negative place where online abuse, trolling, bullying and harassment can take place, which can have a negative impact on mental health; how to be a discerning consumer of information online including understanding that information, including that from search engines, is ranked, selected and targeted; where and how to report concerns and get support with issues online.
Physical health and fitness	<ul style="list-style-type: none"> the characteristics and mental and physical benefits of an active lifestyle; the importance of building regular exercise into daily and weekly routines and how to achieve this; for example walking or cycling to school, a daily active mile or other forms of regular, vigorous exercise; the risks associated with an inactive lifestyle (including obesity); how and when to seek support including which adults to speak to in school if they are worried about their health.
Healthy eating	<ul style="list-style-type: none"> what constitutes a healthy diet (including understanding calories and other nutritional content); the principles of planning and preparing a range of healthy meals; the characteristics of a poor diet and risks associated with unhealthy eating (including, for example, obesity and tooth decay) and other behaviours (e.g. the impact of alcohol on diet or health).
Drugs, alcohol and tobacco	<ul style="list-style-type: none"> the facts about legal and illegal harmful substances and associated risks, including smoking, alcohol use and drug-taking.
Health and prevention	<ul style="list-style-type: none"> how to recognise early signs of physical illness, such as weight loss, or unexplained changes to the body; about safe and unsafe exposure to the sun, and how to reduce the risk of sun damage, including skin cancer; the importance of sufficient good quality sleep for good health and that a lack of sleep can affect weight, mood and ability to learn; about dental health and the benefits of good oral hygiene and dental flossing, including regular check-ups at the dentist; about personal hygiene and germs including bacteria, viruses, how they are spread and treated, and the importance of handwashing; the facts and science relating to allergies, immunisation and vaccination.
Basic first aid	<ul style="list-style-type: none"> how to make a clear and efficient call to emergency services if necessary; concepts of basic first-aid, for example dealing with common injuries, including head injuries.
Changing adolescent body	<ul style="list-style-type: none"> key facts about puberty and the changing adolescent body, particularly from age 9 through to age 11, including physical and emotional changes; about menstrual wellbeing including the key facts about the menstrual cycle.

Relationships Education and Health Education must be accessible for all pupils. This is particularly important when planning teaching for pupils with special educational needs and disabilities who represent a large minority of pupils. High quality teaching that is differentiated and personalised will be the starting point to ensure accessibility. Schools should also be mindful of the preparing for adulthood outcomes as set out in the SEND code of practice, when teaching these subjects to those with SEND.

Schools should be aware that some pupils are more vulnerable to exploitation, bullying and other issues due to the nature of their SEND. Relationships Education and RSE can also be particularly important subjects for some pupils; for example those with Social, Emotional and Mental Health needs or learning disabilities. Such factors should be taken into consideration in designing and teaching these subjects.

In special schools and for some SEND pupils in mainstream schools there may be a need to tailor content and teaching to meet the specific needs of pupils at different developmental stages.

As with all teaching for these subjects, schools should ensure that their teaching is sensitive, age-appropriate, developmentally appropriate and delivered with reference to the law.

Right to withdraw

Parents, guardians and carers do not have the right to withdraw their child from Relationships Education.

Procedure

Every pupil is entitled to receive Relationship and Health Education regardless of ethnicity, gender, religion, age, culture, disability, sexuality, language special needs, disadvantaged and looked after children.

It is our intention all pupils have the opportunity to experience a programme of relationship and health education at a level which is appropriate for their age and physical development with differentiated provision if required.

The PHSE Coordinator is the designated teacher with responsibility for Relationship and Health Education, which is delivered through Science, RE, PSHE, Citizenship, literacy activities and circle time. It is taught by classroom teachers, teaching assistants and, if appropriate, outside visitors such as the school nurse.

A range of teaching methods which involve pupil's full participation are used to teach Relationship and Health Education. These include use of video, discussion, looking at case studies, drama and role play.

Monitoring and Review

The success of the Trust's policy is evaluated through self-evaluation and reporting activities such as:

- Monitoring of planning and timetabling by the Senior Management Team (SLT) and other members of staff;
- Visits from Local Authority personnel and Ofsted inspection arrangements;
- Feedback from parents, guardians and carers and staff, both formal and informal, following Parent Consultation meetings.

This policy was last reviewed in June 2022 and will be due for review by June 2023.
